

Fire Awareness

To comply with Regulatory Reform (Fire Safety) Order 2005

Introduction

To assist employers to meet their obligations as laid down in the new Fire Safety Regulations, Fraser and Associates have developed this course specifically to train personnel as to what to do in the event of a fire occurring and how to select and use the correct extinguisher. Training will be **arranged to incorporate the employers own fire routine** and carried out by our instructors who are all members of the Institution of Fire Engineers and have extensive experience in the Fire Sector.

Topic areas covered:

- Action to be taken in the event of a fire occurring.
- Select the correct fire extinguisher and to tackle a small fire with confidence and safety.

Intended for: All personnel, including those who may be required to use fire extinguishers at their place of work.

Outcomes: By the end of the programme the delegate will be able to;

- Appreciate their role within employer's fire routine.
- How to call the fire brigade
- Identify the different types of fire extinguisher and their uses
- Know when it is safe to tackle a fire using a fire extinguisher
- Correctly select and safely use the appropriate extinguisher. (Achieved by use of environmentally safe Fire Training Simulator)

Prior Knowledge: No prior knowledge or training is required.

Course Duration: 1 – 2 hours (depending on requirements)

Numbers: Minimum by agreement with client,
Maximum 12
