

The Management of Health Safety and Welfare Regulations require employers to appoint a 'competent person' to advise on health and safety issues. However, many small to medium sized organisations can not afford the costs of a fulltime in-house Health and Safety Service nor do they have the time that they need to devote to Health & Safety. Fraser and Associates can provide you with a comprehensive consultancy service, covering all your Health & Safety requirements, ensuring that you comply with all current legislation. Fraser and Associates can assist your company to fulfil all your health and safety duties and provide you with the regulatory 'Competent Person' assistance. A typical Competent Person package is likely to include all or most of the following:

- Initial Workplace Assessment
- Remedial Programme from Initial Assessment
- Preparation and upkeep of all necessary Health and Safety statements, policies, risk assessments etc.
- Annual revision of all policies
- Company Health and Safety Training Programme prepared to meet client schedules
- Accident Reporting to Enforcing Authorities/Accident Investigation
- Company Health and Safety Inspection/Audit
- Liaison with Enforcing Authorities on behalf of client
- Company and employee Health and Safety 'Helpline'
- Annual Health and Safety report for company/client Senior Management for inclusion in Annual Report.

Our Competent Person Service is a low cost high value service offered by Fraser and Associates which provides our clients with the complete range of health and safety support services.

Why not contact us for further information on our Competent Person Service.
